

hi i will support satellite radio for lots of reason not only it is my rights to pay for the xm radio but who the hell want to listen to all talk and no music on the local radio when i can have a huge of music to listen to (my favorite is channel 83 chrome disco old music the REAL MUSIC)and also when driving out on the open highway there nothing to pick up so i hate to keep listening to the tapes and cd's when xm you can drive all over the country and still get good music and also the weather it important as well the traffic (no body like traffic ) so i will 100% support the xm radio system

thanks sal cuccia
